Unlocking Infinite Possibilities

STUDENT NAME: MASIKA KITONGO JEREMIAH

ADMISSION NUMBER: BSCCS/2024/55350

COURSE: BACHELORS IN COMPUTER SCIENCE

UNIT CODE: BIT 3208

SEMESTER: YEAR 3 SEM 2

GITHUB LINK: <https://github.com/masikakitongo/web-database-project->

WEEK 1: Local Environment Setup

Installation and Testing Local Development Environment

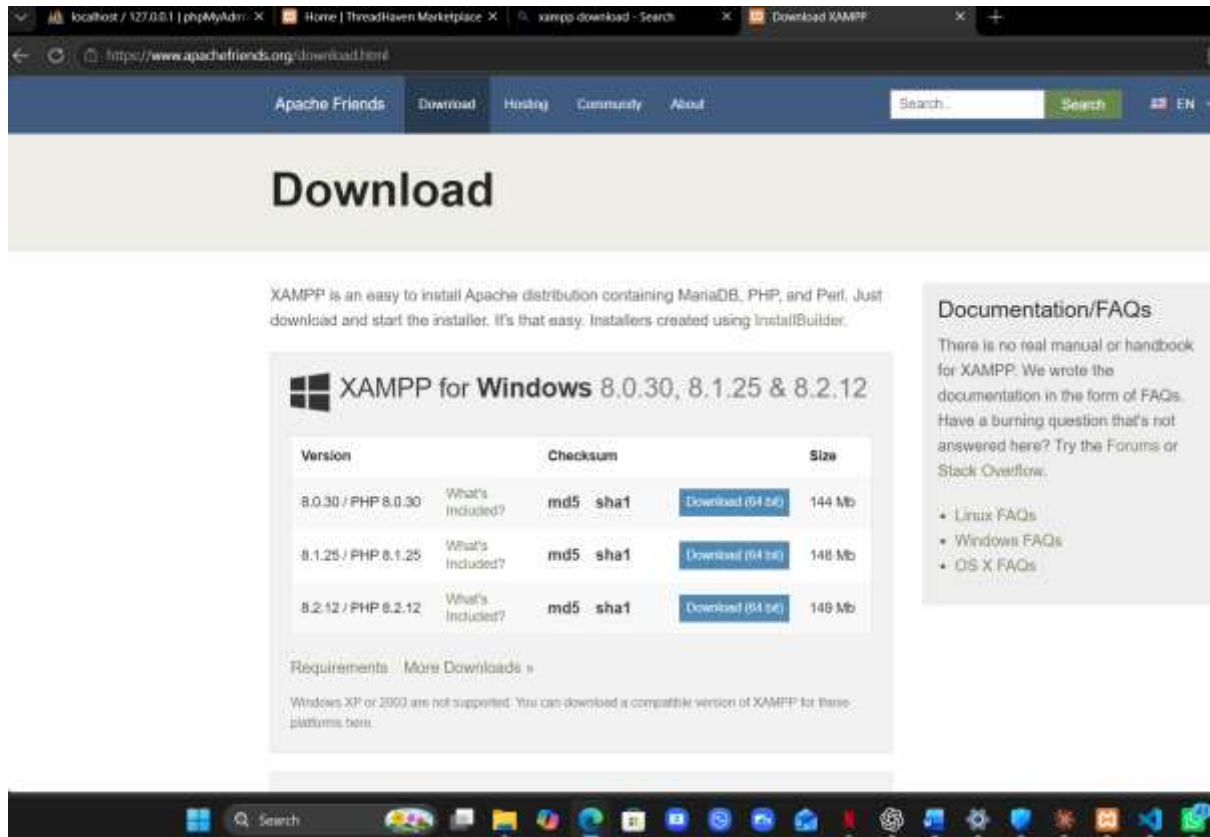

Figure 1: Installation of Xampp

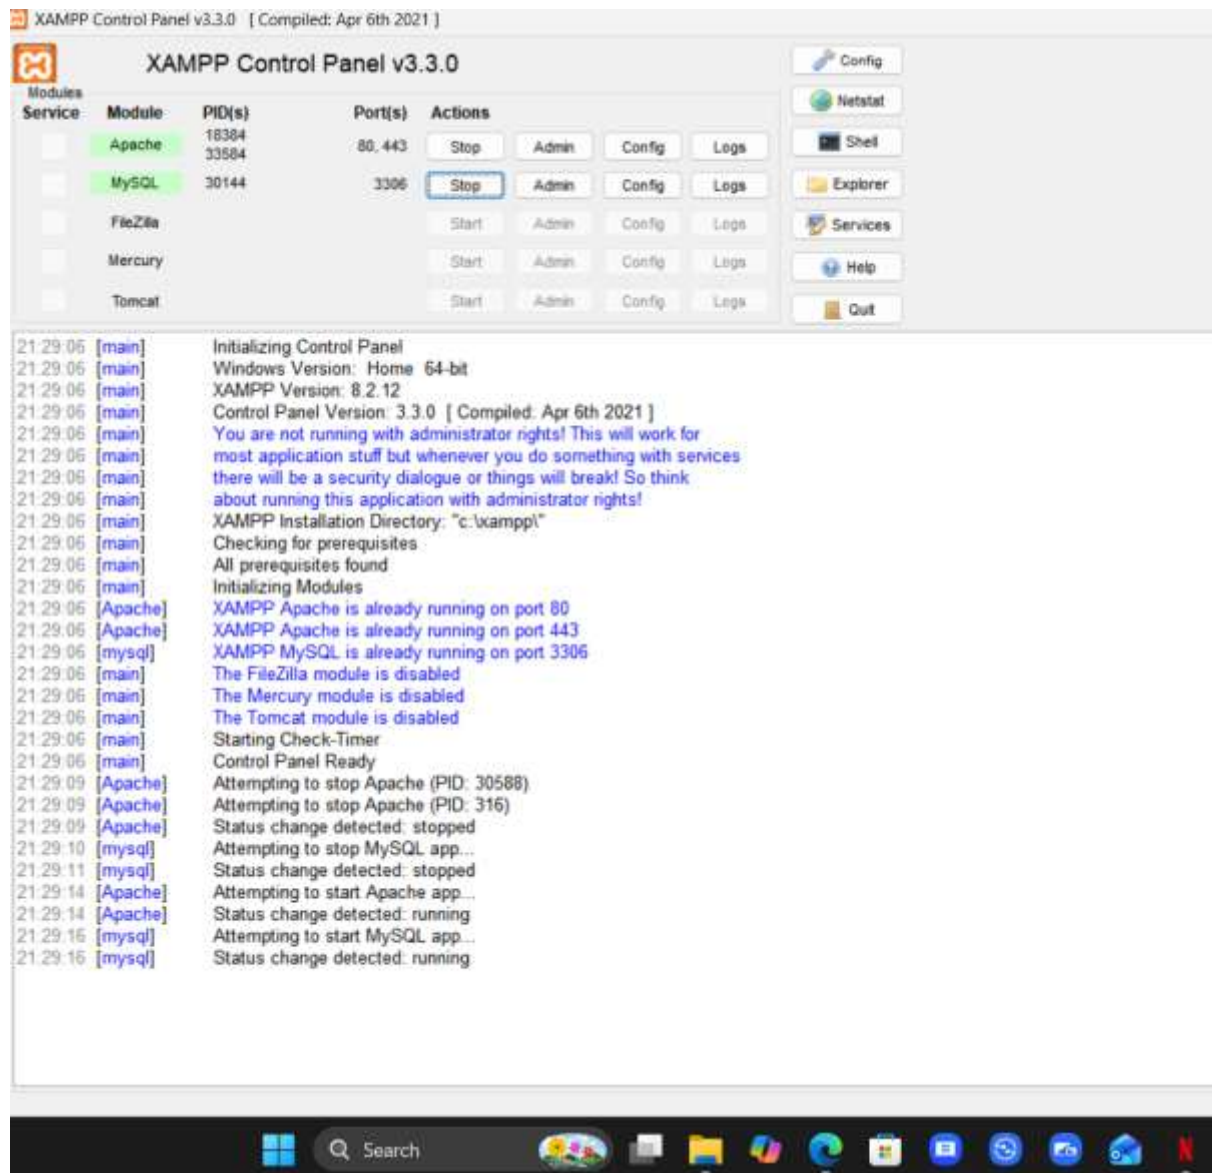

Figure 2: Apache and MySql Running

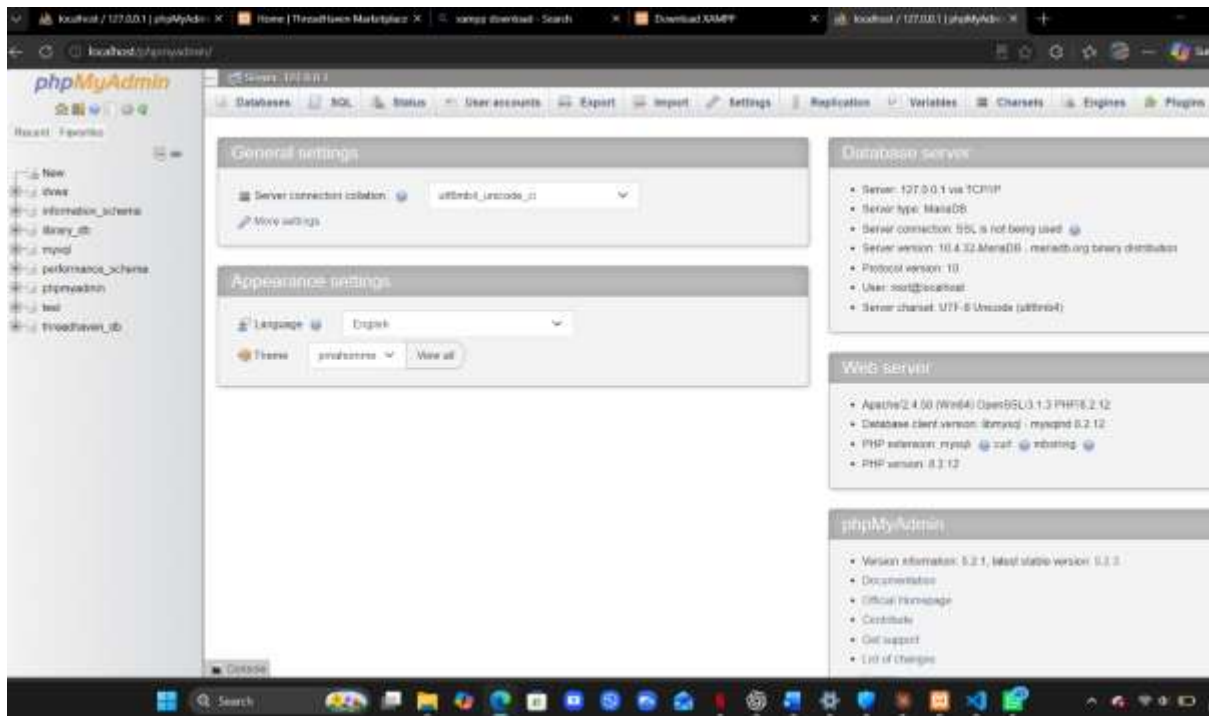

Figure 3: Localhost Test page

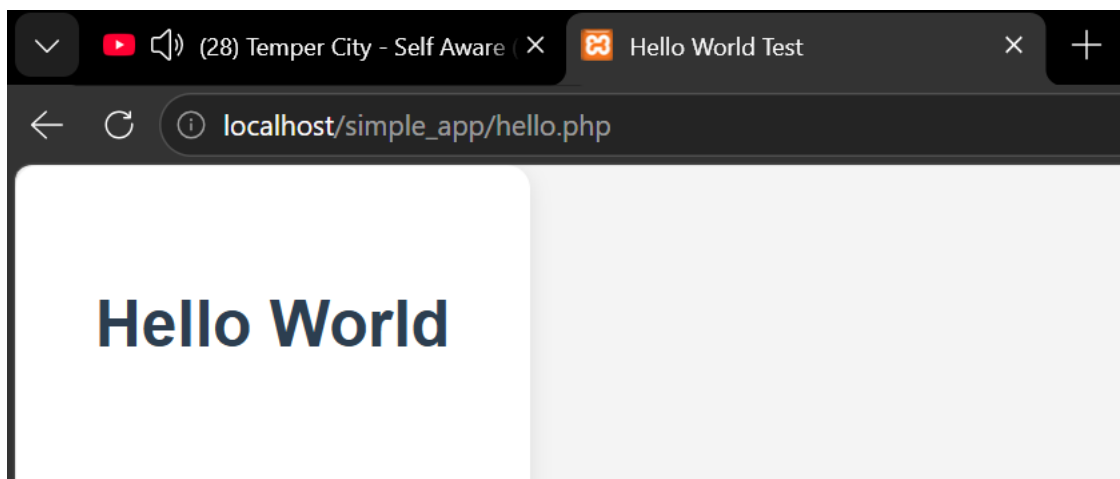

Figure 4: Hello World Test

Figure 5: Database Connection Test

[Project Proposal Summary](#)

I learned how to set up a local server environment using XAMPP, Apache, MySQL, PHP, and GitHub. One of the biggest challenges was fixing admin permission issues and port conflicts before the services could run properly. The screenshots show the progress made during development: Figure 1 shows the XAMPP installer setup, Figure 2 shows Apache and MySQL running successfully, Figure 3 displays the phpMyAdmin dashboard, Figure 4 shows PHP code running in the browser, and Figure 5 confirms successful connection between the backend and the database.

WEEK 2: WIREFRAMES AND GUI DESIGN

User Interface Planning and System Design

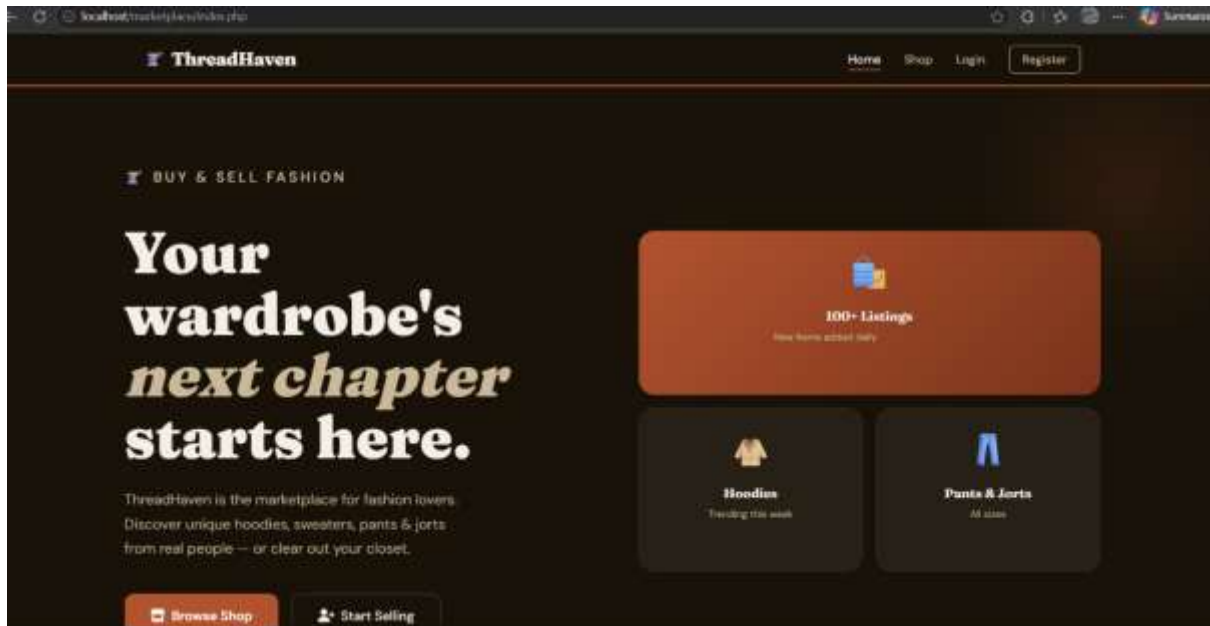

Figure 6: Login/Homepage Wireframe

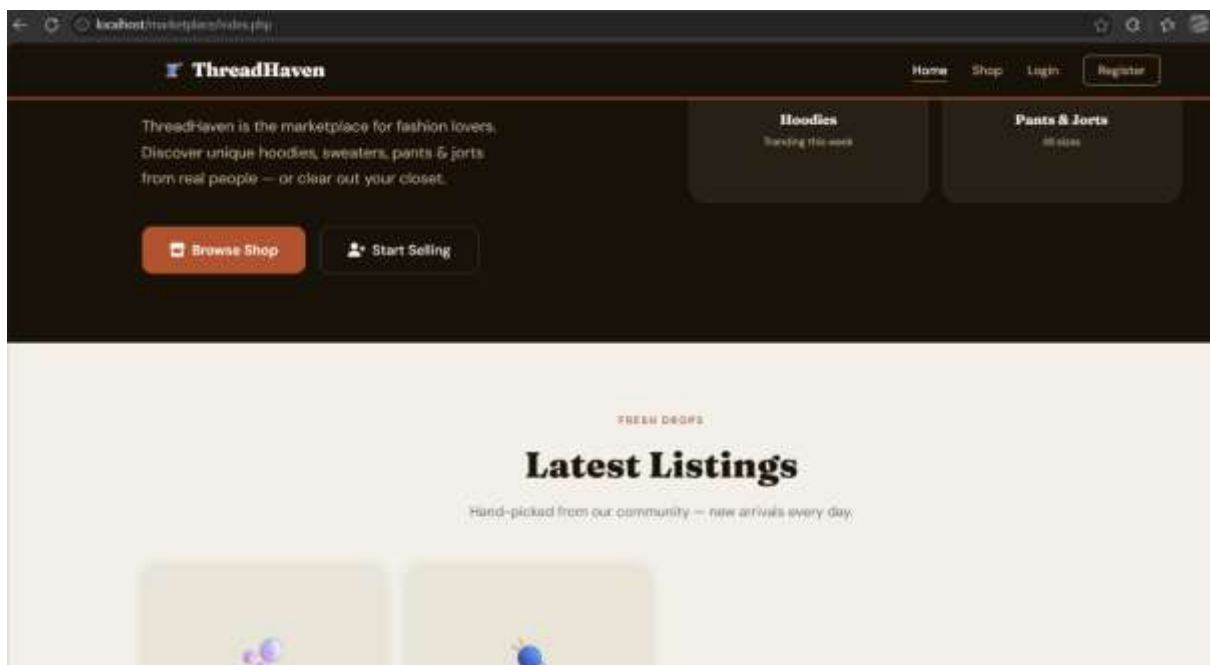

Figure 7: Dashboard Layout Design

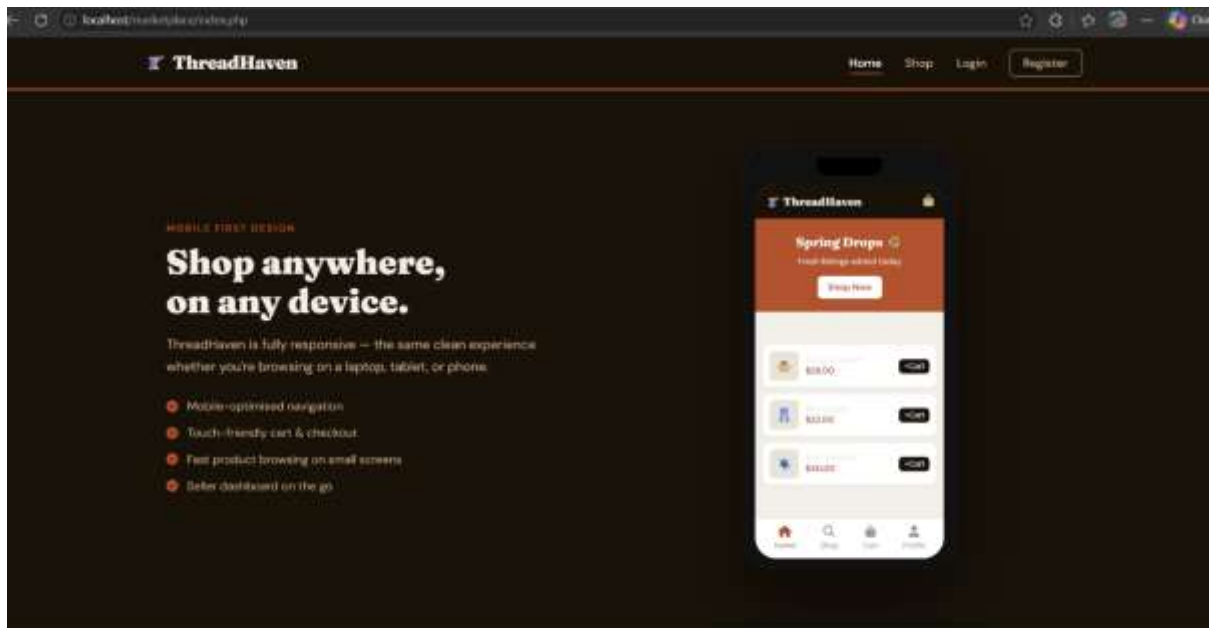

Figure 8: Mobile View Mockup

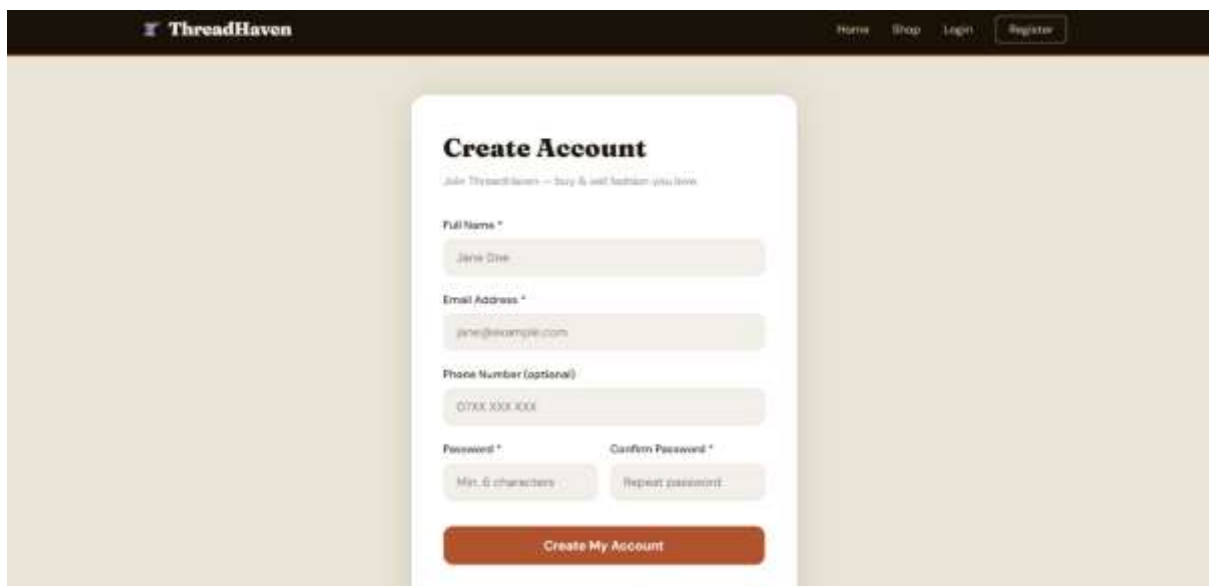

Figure 9: GUI Prototype in Canva

Project Theme

Online Market place

Chosen Technologies

- PHP
- HTML
- CSS
- XAMPP
- Github
- Canva

[Project Proposal Summary](#)

I designed the interface in Canva using a simple and mobile-friendly layout to make it clean and easy to use. The system includes clear buttons, helpful input placeholders, and a “Browse Items” option so users can explore without feeling forced to sign up immediately. A fixed top navigation bar helps users move easily through the system, especially when listing items or logging in. The platform mainly focuses on two groups of users: buyers who want an easy way to find and contact sellers, and sellers who need a simple dashboard to manage their listings.

[WEEK 3: JAVASCRIPT AND PHP BASICS](#)

[Frontend Interactions and Backend Foundations](#)

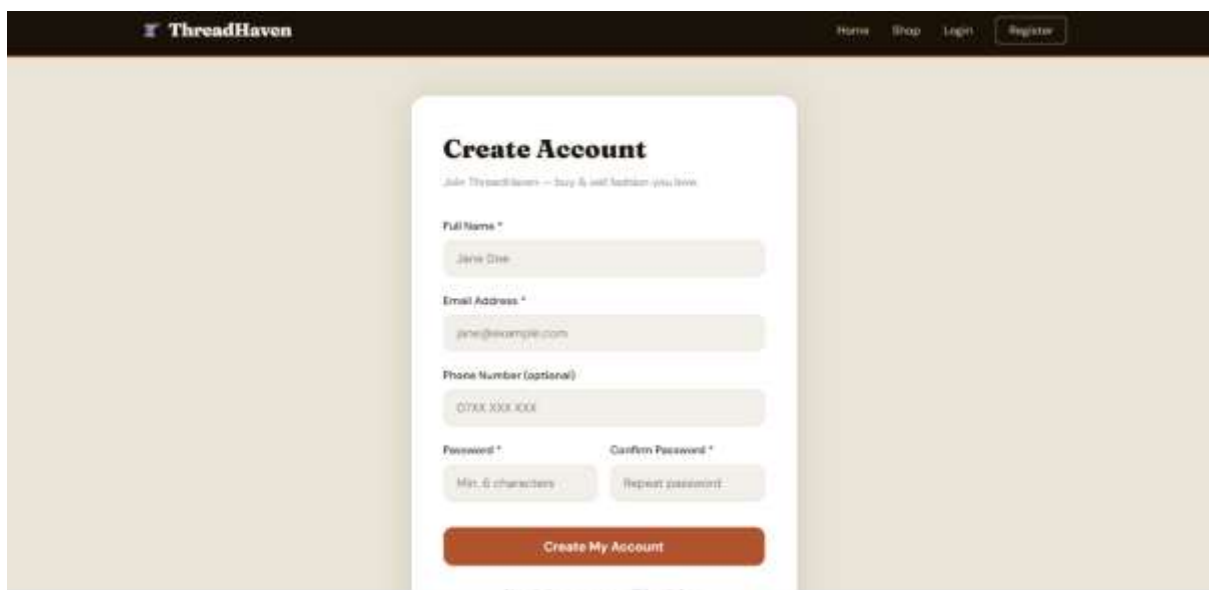

The image shows a web browser window with a dark header bar. On the left of the header is the 'ThreadHaven' logo. On the right are links for 'Home', 'Shop', 'Login', and a 'Register' button. The main content area has a light beige background. Centered in this area is a white rounded rectangle containing a 'Create Account' form. The form has a title 'Create Account' and a subtitle 'Join ThreadHaven - Buy & sell fashion pieces'. It contains five input fields: 'Full Name *' with placeholder 'Jane Doe', 'Email Address *' with placeholder 'jane@example.com', 'Phone Number (optional)' with placeholder '07XX XXX XXX', 'Password *' with placeholder 'Min. 6 characters', and 'Confirm Password *' with placeholder 'Repeat password'. At the bottom of the form is a large orange button labeled 'Create My Account'.

Figure 12: Database Connection Script

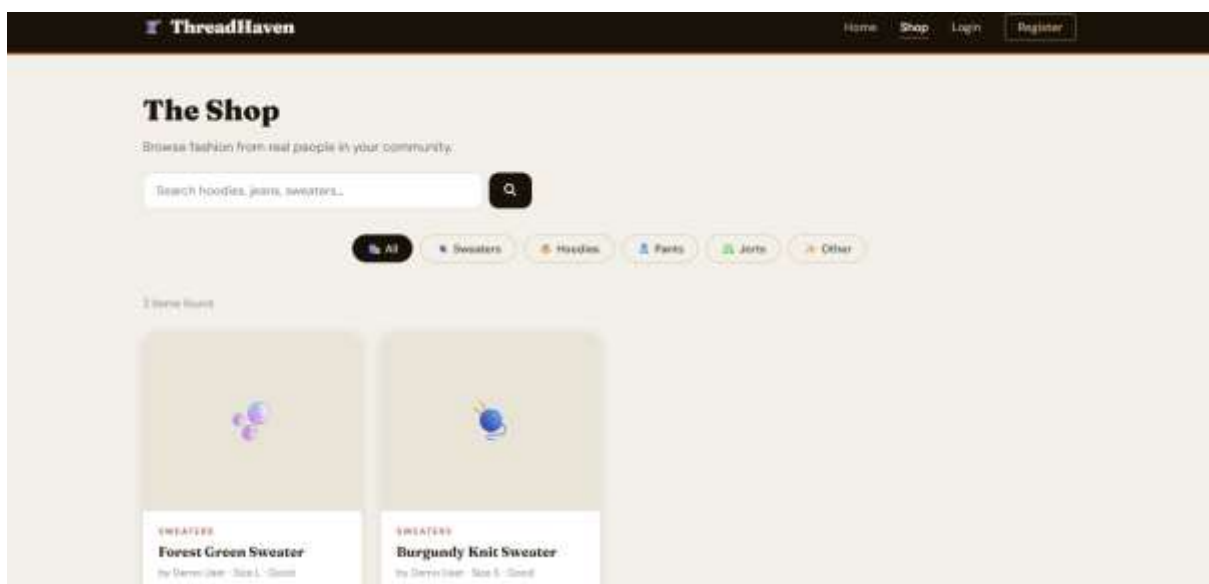

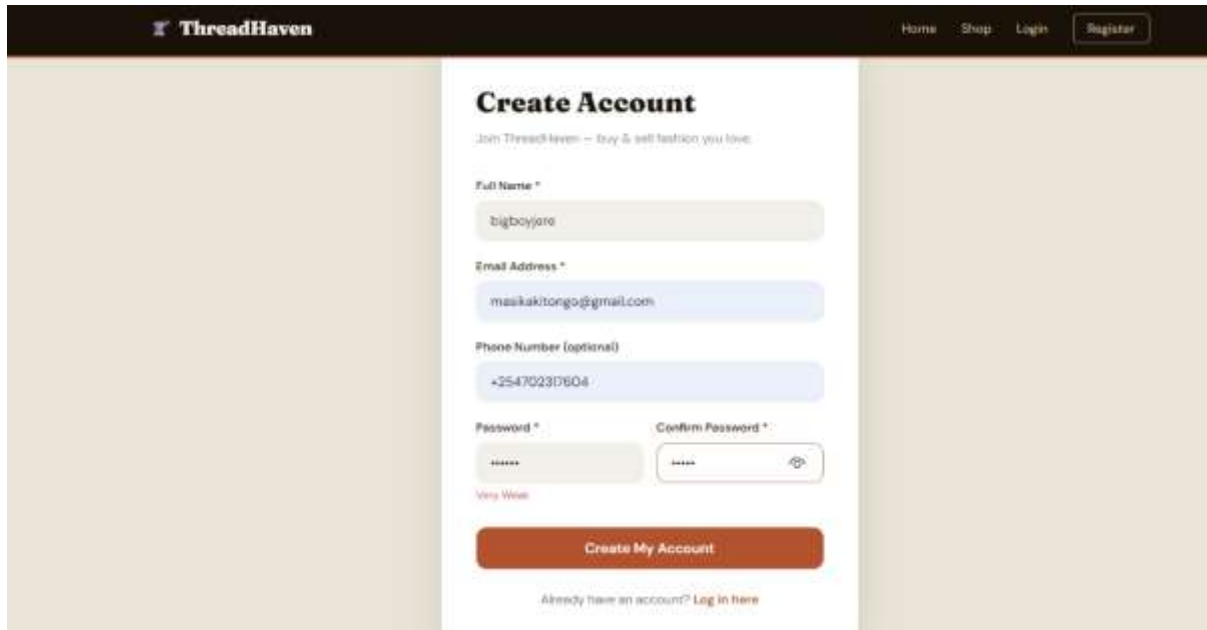

Figure 13: Dynamic User Input Handling

[Project Proposal Summary](#)

During this stage, I connected the frontend and backend so user inputs entered through JavaScript could be processed using PHP. JavaScript was used for instant form validation and password strength checking to improve security and help users avoid incorrect input. I also created a database connection to allow the system to store and retrieve information such as

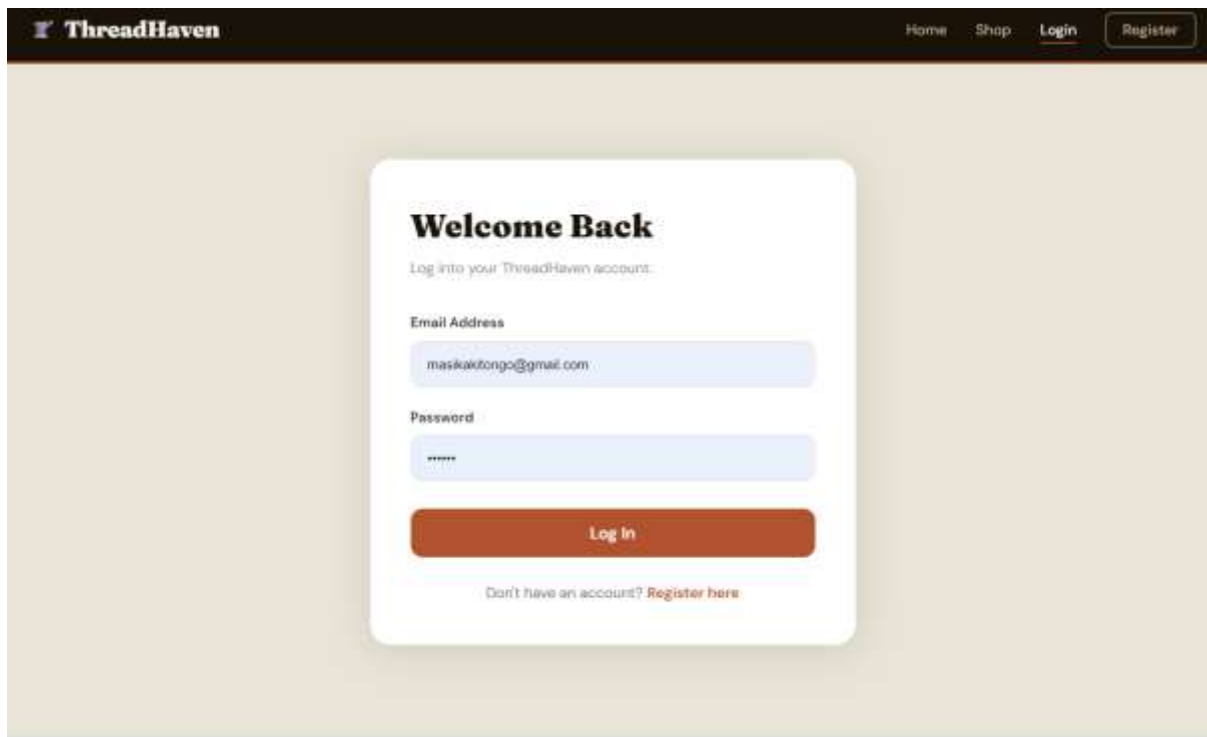

user details and marketplace listings in real time. The project was developed using HTML, CSS, JavaScript, PHP, and MySQL, and tested locally using the XAMPP environment.

WEEK 4

The screenshot shows the 'Create Account' page of the ThreadHaven website. The header includes the ThreadHaven logo and navigation links for Home, Shop, Login, and Register. The main content area features a form with the following fields: Full Name (with the value 'bigboyjane'), Email Address (with the value 'maskakutongo@gmail.com'), Phone Number (optional) (with the value '+254702307604'), Password (with a strength indicator 'Very Weak'), and Confirm Password. A 'Create My Account' button is at the bottom of the form, and a link 'Already have an account? Log in here' is below it.

Figure 14: Registration Form

The screenshot shows the 'Welcome Back' login page of the ThreadHaven website. The header includes the ThreadHaven logo and navigation links for Home, Shop, Login, and Register. The main content area features a form with the following fields: Email Address (with the value 'maskakutongo@gmail.com') and Password (with a strength indicator '*****'). A 'Log In' button is at the bottom of the form, and a link 'Don't have an account? Register here' is below it.
